

FIREPRO[®] 2

...the latest generation in firefighting gloves

Accredited to the Australian Standard for Fire Fighting Gloves - AS2161.6

WHEN PERFORMANCE COUNTS

A superior multi layered glove incorporating a Porelle moisture/pathogen membrane. The Firepro 2 firefighting glove possesses excellent heat and cut resistance while still retaining maximum feel and dexterity.

Hi-wear Leather Outer

Hi-wear leather outer, developed specifically for Firefighting operations, to give the right balance of protection and dexterity.

Porelle Membrane

A microporous and hydrophylic structured membrane between the outer leather shell and the inner lining (NFPA 2000 compliant). This membrane is highly waterproof whilst remaining breathable. Accredited testing has proven its performance as a total viral and blood borne pathogen barrier (to ASTM F 1671-95).

- Incorporating a fire resistant double ribbed cuff, complete with wrist protector.
- Sewn with 100% 3 ply Kevlar thread throughout.
- Reinforced High Wear seams.
- Kaneceron (35% Kevlar, 65% Nomex Jersey) lining for heat resistance and cut protection.
- Aquapel leather protector for easy care and water resistance.
- Porelle moisture/pathogen membrane.
- Fire resistant Scotchlite reflective trim.
- Seven sizes XS, S, M, L, XL, XXL, XXXL.
- Custom made facility available for one-off sizes.
- Accredited to both AS2161.6 and EN659.
