Xtreme-Guard Webbing with Self Healing Matrix

A super soft feel webbing which has been treated with a non toxic compound to maximise oil and water resistance. This makes cleaning a much easier task and enhances abrasion resistance. The treatment will self repair should the extremely thin polymer coating become damaged, due to its plasticine like flow qualities and the ability to re-close mechanically.

Xtreme Guard webbing comes standard on Spanset ERGOiPlus Harness Range.

Refer to ERGOiPlus product info for full details on harness options and NEW iWeb features.
